

Workshop: Wave Release Update For Power Platform and Dynamics 365

Duration: 1 day

Focus Area: Business/IT Alignment

Difficulty: 100

Intended Audience

The following roles will find this community workshop useful. Others may also attend, as described in the secondary Audience section.

Primary Audience: Customers interested in learning more about upcoming features and changes in [Release Waves](#) for Microsoft Power Platform and Dynamics 365. Typically this includes administrators and power users or business managers who have some familiarity with the Power Platform ecosystem. However previous knowledge is not required.

Secondary Audience: Users of Power Platform and Dynamics 365 looking to gain more knowledge in the functionality and features of the application.

Overview

This is a flexible, instructor-led training course that focuses on the latest Release Wave for Power Platform and Dynamics 365. The instructor will cover key features that are planned to be released in the latest release wave. Overall duration will depend on customer preferences and topics covered. Prior to delivery a scoping call will be conducted to determine what features are to be covered in the session and the instructor will provide a time estimate for the session.

Objectives

- Provide attendees with proactive information related to Power Platform and Dynamics 365 to assist with future planning and provide awareness of new functionality.
- Review highlights of announced features related to the latest release wave, with focus on features that may directly impact users or may be compelling to business managers and IT admins.
- Understand the release timelines and any required actions to address changes.
